Lighting

Minimal with attitude. Made in Italy  
2025

## MINIMAL WITH ATTITUDE. MADE IN ITALY

At Plato Design, we create lighting that fuses minimalist design with the raw elegance of concrete and colours. Our motto, "Minimal with Attitude," captures our essence - simple yet distinctive.

Each lamp is designed and meticulously handcrafted in our workshop, nestled in the picturesque valleys between Umbria and Tuscany. Here tradition meets innovation and every piece tells a story of Italian craftsmanship and timeless beauty.

# ADA

A decorative versatile light

With its circular timeless shape, Ada is a decorative lamp that lights up both the surrounding environment and the concrete disc, highlighting its handcrafted surface and its contemporary colourful design.

Ada is a versatile lamp that can be used both on wall and ceiling and whose style can change radically by using different bulbs: minimalist, classic or retro.

The richness of the proposed colours makes it possible to customize Ada to adapt to each project, from those where neutral shades are requested to those where bright colours are preferred.

The shades on the concrete surface and the slight imperfections of the material make each Ada a unique handcrafted piece.

## ARGIA

### A sophisticated point light

Argia is a collection of adjustable spotlights ideal for punctual lighting of domestic and commercial spaces. The textural character of concrete, combined with the broad colour palette, meets the versatility of an adjustable spotlight, giving a new look to a typology that is widely used for its adaptability.

Every detail of the Argia collection is carefully designed to give it a minimalist and sophisticated look at the same time: the raw brass bracket, the compact handmade concrete base that matches the colour of the adjustable part, the use of long-lasting materials with a natural finishing.

Argia is available in the single version, with or without cable, and in the Maxi version which consists of three adjustable spotlights.

## CROMIA

Pure shapes meet colour

Concrete, coloured pigments, water, light, experience and passion. Each Cromia lamp is born from these ingredients, worked by hand in Italy. The bubbles and the surface veils tell of the material and its craftsmanship, while the unexpectedly reduced thickness and the extraordinarily non-grey appearance are the result of the desire to innovate.

The collection includes wall, pendant and ceiling lamps recognizable by their pure shapes and their vast range of colours: from gray to blue, passing through neutral shades, green, red and purple.

The range of models and colours proposed makes it possible to create infinite possibilities and customizations to adapt to each project.

## ESSE

The lamp that challenged lockdown

Born as a pilot project in the spring of 2020 when the world experienced one of the greatest upheavals of recent decades due to the spread of Covid-19, Esse is a lamp made by hand in concrete whose essentiality - hence its name - is the result of the change that took place in the world of production and design. The limitations of those days have been the reason it was given its monolithic aspect and its minimalistic lines, interrupted only by the side slot that allows the installation of electrical wiring without equipment. Know-how on the craftsmanship of concrete has given colour and rigor to the Esse lamp. Thanks to its half-cylinder shape, the lamp can guarantee two light modes: direct and shielded.

*Esse table lamp*

## ILA

A refined reinterpretation of a classic industrial lamp

Ila revisits the most evocative of industrial lamps, transforming it into a refined hanging lights collection, where the minimalist aesthetics meet the handcrafted character of coloured concrete.

Its extremely simple shape, its width reduced to a minimum and its opaque surface make it suitable for illuminating spaces where essentiality dominates. The material character of the concrete it is made of and its colour make it appropriate also for contemporary environments with a strong personality.

Available in two sizes and in the single or

18

Trio versions, Ila can be used individually for spot lighting or in groups to illuminate large spaces.

## LENA

The elegance of a light bulb

A colourful cylinder that enhances the beauty and elegance of the light bulb. With its simplicity Lena embodies the “minimal with attitude” concept that characterizes Plato Design’s collections, combining minimalistic lines with recognizable materials and colours.

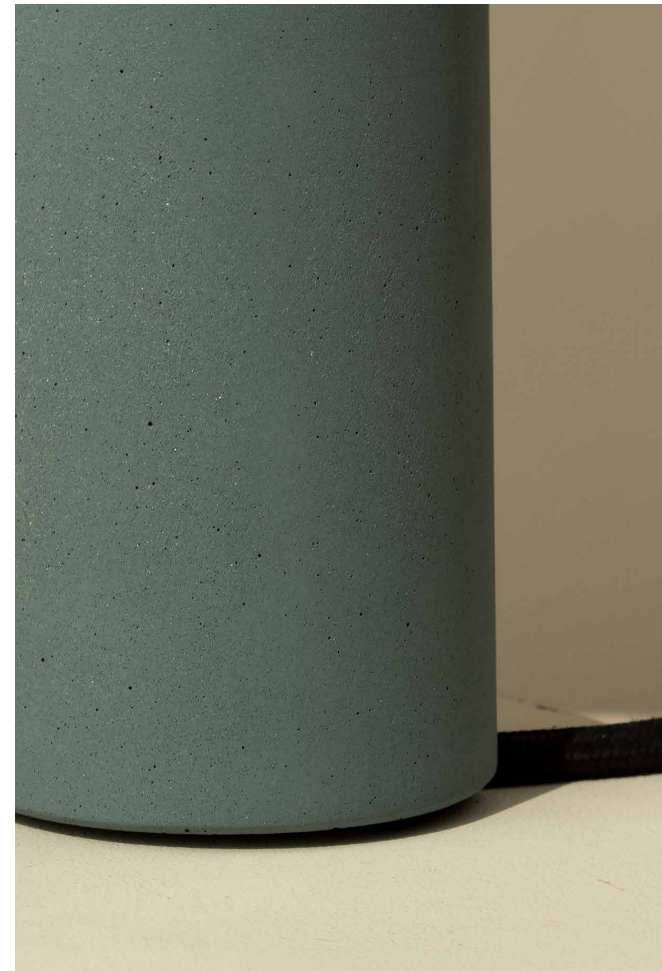

Designed to add a touch of brightness and colour to any space, whether on a bedside table, desk, coffee table, or shelf, Lena stands out for its versatility and timeless style. This is achieved through the elegance of its sleek forms, the sophistication of the handcrafted concrete surface, and its distinctive colour palette.

Lena is not just a functional lamp but an object that seamlessly blends style, light, and colour.

23

# OTTO

## Adding personality to linear light

The Otto wall lamp reinterprets the traditional linear visible light, with its architectural character, in a non-industrial key. The coloured concrete "button", with its texture, adds personality to one of the purest forms of lighting in existence.

Otto is ideal for accent lighting or for creating light installations on both walls and ceilings.

The variety of colours proposed and the fact it can be installed vertically, horizontally or at an angle, means that it can be used in all environments.

## TEO

A touch of colour and functionality to the ceiling

Teo is a recessed spotlight that stands out for its simple shape and its matte coloured concrete surface. With its twenty-four available colours, it can be used to add a touch of colour to the ceiling, whether in minimalist environments or bolder spaces. Its materiality and essential design make it recognizable and capable of giving character to rooms without sacrificing functionality. Teo offers high-quality lighting and can be used individually or in groups to create customized lighting effects, allowing specific points to be illuminated in both public and domestic environments, emphasizing architecture, furniture and decorative details or creating diffuse light.
